Manager's comment

In November we lost 1% underperforming our benchmark by 2.4%. Although we started the month on a high note thanks to a very good earnings reporting season with 75 % of our firms meeting or beating analyst forecasts, the fund performance suffered significantly during the last week of the month.

For the year we are up 5.0%, still beating our benchmark by 5.1%. Our volatility (16.1%) and beta (0.91) remain very close to the volatility and beta of our benchmark. The collapse in stock prices created a buyback binge: 92 firms announced buyback programs, the largest number since November 2014.

As a result, we used this opportunity to invest in 4 new companies: Himax, Nova Measuring Instruments, Unifi and Modine manufacturing. We sold Owens Reality after a takeover, our first takeover of the year.

Fund strategy

The PV Buyback USA Fund is a long-only fund focused on small and mid caps listed on the US equity market. It invests in companies announcing share buyback programs to take advantage of an undervalued stock price. To identify those firms where the repurchase is most likely motivated by undervaluation, the Fund has developed a systematic approach. Fund managers are highly experienced and have a strong track record in developing and implementing this investment strategy.
