Manager's comment

In November 2019 we earned 1.1% bringing our total return for the year to 14.5%. Although we can look back at a good Q3 reporting season with 80% of our firms beating or matching earnings forecasts, some misses were heavily punished so that we underperformed the Russell 2000 by 2.8%, lowering our 2019 alpha to -6%. Also, although the U.S. economy is doing well and there is no recession in sight, global weakness is hurting some of our stocks that are exposed to these global forces such as energy stocks, materials and stocks exposed to China which continue to be driven by uncertainty about the ongoing trade dispute which will hopefully be resolved soon.

This month 39 companies announced buyback programs. We sold I-Robot, Gulfport Energy and bought Pitney Bowes.

Fund strategy

The PV Buyback USA Fund is a long-only fund focused on small and mid caps listed on the US equity market. It invests in companies announcing share buyback programs to take advantage of an undervalued stock price. To identify those firms where the repurchase is most likely motivated by undervaluation, the Fund has developed a systematic approach. Fund managers are highly experienced and have a strong track record in developing and implementing this investment strategy.
